Gene,

I'm ok now. There was a mix-up in the email they added me under. It's been taken care of.

Fred,
I've been in the field all day. Did they get your access set up? It should have been done when I first set up the lab. I checked the server and there are several data packages uploaded for dimock.

Subject: TechLaw Project No. R33917

Brian,

TechLaw is under contract with EPA to perform work of which they have contracted with TestAmerica to perform the analysis. The TechLaw Project No. is R33917. My branch is responsible for receiving the Level 4 data packages and performing the data validation.

To date, we have only received 2 final reports which where Level 2? reports. Additionally, I recently noticed that when I log onto the Test America's Total Access portal, I only see the Denver lab data and not the Buffalo data.

Please assist in addressing these issues.

Fred
